

## Product Data Sheet

### **C-FINE 2020**

Anti-corrosion Chemical Additive for Closed Circuit Recirculation Systems

#### **Technical Description**

The chemical additive C-FINE 2020 is a liquid product, based on nitrogen compounds and pH regulating agents.

#### **Applications**

The chemical additive C-FINE 2020 is a product developed for the water treatment in closed recirculation circuits of cold or hot water. The product may be used in circuits made of various materials (carbon steel, copper alloys etc.) At the same time, the pH value of the recirculating water is adjusted in the optimal range.

#### **Packing**

C-FINE 2020 is available in 25-Kg non-returnable polyethylene canisters. Other packing available on request.

#### **Dosing**

The chemical additive C-FINE 2020 is added to the make up or to the recirculating water, by a suitable dosing pump. C-FINE 2020 is added to the water in a shock dosage of 6kg per cubic meter of recirculating water. It can be used as the concentrated product or as a dilution with softened water in any proportion.

#### **Product benefits**

Excellent protection against carbon steel and copper alloys' corrosion, even for very aggressive waters.

Liquid product, easy to use.
