

CASE STUDY (006-M-E) **Municipality, Greece**

Desalination System 900 m³/day

DATE OF IMPLEMENTATION
February 2016

PROJECT

Early in 2016 TEMAK delivered, commissioned and set in operation yet another Sea Water Desalination Plant with a production capacity of 900 m³/day of drinking water in prefabricated containers. The unit meets the drinking water needs of the Community. It is important to note that the unit has a solar system by which are electrically fed the secondary systems, such as the automation, lighting, etc.

Since 1980, TEMAK has been at the side of local communities covering their needs with

reliability and consistency, having a full range of certified water treatment products.

Thanks to the systems manufacture in Greece and the high expertise of its specialized staff, TEMAK is able to offer total water treatment solutions, from study and design to manufacture and installation of required systems.

The 650.000 m³/day of clean potable water or water for general uses, produced daily from TEMAK's installed systems in Greece and 26 abroad countries, constitute the proof of our experience and know-how in water treatment.
