

CASE STUDY (008-M-En) **Municipality, Greece**

Two Containerized Sea Water Desalination Plants 100 m³/day each

DATE OF IMPLEMENTATION
2016

PROJECT

Two containerized Sea Water Desalination Plants producing min. 100 m³/day of drinking water each, were installed by the TEMAK at two border islands of the Aegean to meet their water needs.

Since 1980, TEMAK has been at the side of local communities covering their needs with reliability and consistency, having a full range of certified water treatment products.

Thanks to the systems manufacture in Greece and the high expertise of its specialized staff, TEMAK is able to offer total water treatment solutions, from study and design to manufacture and installation of required systems.

The 750.000 m³/day of clean potable water or water for general uses, produced daily from TEMAK's installed systems in Greece and 26 abroad countries, constitute the proof of our experience and know-how in water treatment.
