

CASE STUDY (033-U-En) **Residence, Greece**

Desalination Plant of Sea Water 220 m³/day

DATE OF IMPLEMENTATION
2018

PROJECT

A Seawater Desalination System with a capacity of 220 m³/day was installed by TEMAK S.A. in Porto Heli for the production of potable water, to provide water to a big summer house. Due to limited space, after the necessary quality control tests the system was disassembled at TEMAK's premises and reassembled at the customer's house, where it was set in full operation.

Since 1980, TEMAK has been at the side of local communities covering their needs with reliability and consistency, having a full range of certified water treatment products.

Thanks to the systems manufacture in Greece and the high expertise of its specialized staff TEMAK is able to offer total water treatment solutions, from study and design to manufacture and installation of required systems.

The 750.000 m³/day of clean potable water or water for general uses, produced daily from TEMAK's installed systems in Greece and 26 abroad countries, constitute the proof of our experience and know-how in water treatment.
